

# Point of Sale System (POS) for Restaurant

## One Stop Solution for restaurant services

Combining all customer self-service functions in one application including food ordering, order tracking, and self-payment.

### Paperless restaurant menu

*" Contactless and Paperless with Electronic MENU "*

Customers just simply scan your QR code to view your restaurant menu on their smartphones (Compatible with both iOS and Android), then they can explore the menu to order their dishes.

### Real-time order status

*" Track order status easily in real time "*

RESTO App links with the restaurant kitchen to facilitate the customer's order tracing. Once a chef selects the order to start cooking, the customer can view the order status on the application immediately.

### Customer self-service payment

*" Pay at the table by online payment supporting cashless society "*

Enabling your customers to pay online via PromptPay, mobile banking and credit card. Your customers can complete the payment by themselves via RESTO App.

### Point of Sale, Point of Service

*" One App for all functions "*

Not only the functions for your customers, RESTO App also provides many functions for restaurant staff to manage customer orders, receive payments and print receipts.
