

Robotic Process Automation (RPA)

RPA

Automate your repetitive tasks

Using software robot technology to do computer tasks instead of human. Robot can work faster and more accurate than human without work hours constraints.

Robot on any application

Applicable to all platforms and all applications. Robot can quickly and accurately retrieve data, input data and create reports.

Robot for web scraping

Collecting necessary data on a website and process them to be easily to use.

Robot to extract emails

Accessing to email body and the attachments, and extracting data from the email for further use.

Robot dealing with database

Accessing to database to read, write, update, delete, or extract the required data promptly.

Robot in social media

Applicable in social media such as notification setting on LINE Official to facilitate your work.
